Thomas W Schaller
The Architecture of Light and Shadow

A common phrase we often hear is: "Mother Nature is the best teacher." While Tom agrees that real world observation is a crucial skill for the artist, no less so are the lessons to be learned from memory, dreams, and pure invention. In Tom's workshops, painting indoors or out, he demonstrates the fundamentals and crucial importance of identifying strong compositional subjects for the artist. No amount of technical expertise or finesse evident in a final painting can compensate for a composition lacking in the strength and clarity of a strong initial intent, a main idea, and a solid value organization. We will try to learn how to see the beautiful and infinite compositions all around us and within us in the most grand and most humble of scenes.

Fealing Lin
Luminous Faces and Figures

Although portrait painting can be very intimidating, Fealing will teach you how to relax and enjoy the process as you discover the spontaneity and uniqueness to watercolor. You will also learn how to capture the quality of light available to you. You will achieve a level of transparency with your images and develop an understanding of head architecture that will give you the confidence to take on even the most challenging portraits. There will be daily lecture, exercise and demo. Fealing will assist and critique student's works whatever way she could, and allow the students to work on their own pace. During this workshop, learn how value and temperature change, as well as how to use transparent glazing to allow the glow of the paper to shine through. By balancing colors and weaving lights and darks, you will achieve painterly and successful paintings.
